

Barrier-free environment

Fort Monostor welcomes all visitors, including disabled guests. Most of our tours, involving the **Permanent Exhibition on War History** and the outdoor **Military Technology Park**, have been made barrier-free and thus available to all our visitors. The route accessible to our disabled guests is shown on a separate map, which can be downloaded [here](#) [1] or obtained free of charge at the ticket office of the fortress. Although the specialized map is only available in Hungarian language, it can be useful for foreign visitors as well if used together with our German or English walking map.

A scale model of the fortress is available to our blind and visually impaired visitors in the exhibition room "Castles, fortresses and soldiers".

The exhibition of the Danube Bastion related to navigation on the Danube is accessible also by wheelchairs.
